Hi David,

Thanks for the comments. A few comments/questions:

- I agree with removing planting in the sloped triangular area near the ramp. I'd suggest we replace this with riprap considering the slope. Would you also like us to remove the planting at the 3' buffer and replace with boulders?
- I've added six buckeyes south of the path
- I'll add skatestops to handrails, and a "notched" skatestop detail for the walls (John, we can coordinate).
- We'd like to clarify the vehicular access-- we recommend only accommodating vehicles on the western side of the project, and not anything within the retaining walls or beyond in the area under the on ramp. This seems to be in line with the current loop that vehicles make in this area. If you agree we can show a 6" concrete path in the part of the path outlined with a dash below, and 4" everywhere else:

Thanks!
Lawrence

Subject: FW: Hairball Project

Hi Lawrence and John,

See comments in attached PDF from operations review as well as additional comments from Carla/Peter below:

- remove planting and use boulders?
- add trees to large lot if we can afford 3 year maintenance (she suggested something showy like Horsechestnut or something native like buckeye)
- Do we need to add skatestops?
- increase concrete thickness for vehicular load

Thanks,
David

Hi David,

It was nice meeting with you today. Attached are my review comments. Please let me know if you need anything else.

Thanks,
Peter
